

CLEAN COPY OF CLAIM 1

B1

1. (Twice amended) A component comprising at least one support member (1) having a first connecting portion and at least one part (6, 28) having a second connecting portion (7), wherein said second connecting portion (7) is connected to said first connecting portion, wherein for achieving a permanent adhesive connection between at least said second connecting portion (7) and said first connecting portion, said second connecting portion of said at least one part (6, 28) is comprised of poly fluorocarbon, wherein a surface of at least said second connecting portion (7) is activated by plasma activation to form a plasma-activated surface for connecting said at least one support member (1) and said at least one part (6, 28), wherein said plasma-activated surface is plasma-etched by a micro sand-blasting effect caused by the plasma activation in a micro area.
